Education

Madhav Institute of Technology & Science (MITS) — Gwalior, India
B.Tech in Artificial Intelligence - CGPA: 8.76 — *Aug 2025 – Jul 2029*

Vidyavati Public Central School — Bhind, India
Higher Secondary (Class XII) - CBSE [77.4%] — *Apr 2023 – May 2024*

Technical Skills

Languages: Python, Java, C++, C, TypeScript, SQL, HTML/CSS
Frameworks & Libraries: React.js, Tailwind CSS, NumPy, Matplotlib
Tools & Technologies: Git, GitHub, MySQL, PostgreSQL, Firebase, Jupyter Notebook
Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming.

Experience

AlgoLib — Gwalior, India
Founder & Lead Software Engineer ***[Live Site]*** — *Jan 2026 – Present*

- Architected a scalable educational platform for Data Structures and Algorithms (DSA) visualization, driving 800+ cumulative site visits and acquiring 50+ active registered users.
- Engineered the frontend architecture using React.js, TypeScript, and Tailwind CSS, integrating a real-time DSA visualizer and an interactive live contest module to enhance student learning.
- Directed a cross-functional team of 5 members (UI/UX, Testing, Marketing), establishing agile development workflows and rapid prototyping to accelerate the product time-to-market by 30%.

Projects

XYNC Project Management System | *React.js, PostgreSQL, Tailwind* [**Live Site**] — Feb 2026 – Apr 2026

- Developing a responsive full-stack project management dashboard designed to streamline team workflows, optimize task allocation, and track real-time daily progress.
- Designed normalized relational database schemas in PostgreSQL to ensure data integrity, coupled with Firebase for secure user authentication and efficient client-side state management.

Digital Voter Registration System | *Python, Tkinter, MySQL* [**GitHub**] — Aug 2023 – Dec 2023

- Engineered a secure desktop application enabling user registration, biometric photo uploads, and credential validation.
- Implemented a robust MySQL backend for secure credential storage and rapid data retrieval, automating the generation of digital voter ID cards and reducing manual processing time by an estimated 80%.

Achievements & Research

Research Assistant (Cryptographic Protocols) | *Mentor: Dr. Satyam Omar* — March 2025 – Present

- Conducting academic research on modern cryptographic algorithms and data security protocols, focusing on the performance and optimization of secure data transmission.

Competitive Programming | *Java, C++* — Oct 2025 – Present

- Active participant in contest with highest rating 1400 in CodeChef and 996 in CodeForces specializing in problem solving, algorithmic problems and optimizing time/space complexity.

Certifications

Machine Learning Operations (MLOps) with Vertex AI - Google Arcade

Introduction to Machine Learning - Microsoft Learn

JAVA Problem Solving - Basics - HackerRank
